10
YEAR
GUARANTEE

Our guarantee for peace of mind

Our 10-year extensive product guarantee is designed to provide you with peace of mind when purchasing an Elitis product, covering you against product defects.

We are able to offer such a high level of guarantee as Elitis products are manufactured by us, an award-winning manufacturer. All products are bespoke and handcrafted in UK to the highest standards.

Our windows and doors are made in state-of-the-art modern factories so you can be sure of the quality of the workmanship and the product you choose for your home.

All installers of Elitis products are FENSA or CERTASS registered, this provides consumers in England and Wales, important cover when it comes to installation. It means that your windows are installed by a certified installer, that the work complies with building regulations, and importantly that you will have an insurance backed guarantee – which covers the installation of your new Elitis product.

By choosing an Elitis installer you will receive all the necessary paperwork to confirm the installation meets Building Regulation requirements. This paperwork is required to sell a property after windows, and some doors, have been replaced.

Elitis Sustainability

Made and recycled in the UK

The environment is important to us which is why we ensure our uPVC and aluminium products are designed to minimise waste and contain some recycled content where appropriate. 95% of our factory offcuts are recycled and we also recycle the windows and doors Elitis installers take out of homes when replacing with new ones.

uPVC remains a great durable, low maintenance and energy efficient option. Thanks to recent advances in recycling, uPVC products can be recycled numerous times, with the uPVC actually gaining strength when

recycled. However, virgin uPVC is used on external surfaces to ensure the perfect finish and no loss of colour stability. Aluminium is the most recycled material in the world and we have the very best recycling procedures in house to minimise any waste.

Buying Elitis windows and doors is good for your home, your pocket and the environment.

Re-useable and recyclable for hundreds of years

Research has shown that 95% of 'post-consumer' or end-of-life uPVC windows can be recycled. The official product life for a uPVC window or door is up to 35 years (BRE) and they can be recycled up to 10 times meaning 350 years of re-use with minimal impact on the environment.

Made and Recyled in UK

Environmentally responsible

At Elitis we are committed to sustainable developments in the uPVC industry. This is why we use waste windows frames, that would otherwise go into landfill and recycle the material to create brand new windows – windows made from windows, for closed-loop material sustainability.

Our windows represent a genuine sustainable option. Not only because they help reduce CO2 emissions, but also because uPVC is a fully recyclable material. Each year, tens of thousands of tonnes of uPVC are recycled, minimising impact on landfill waste sites.

ELITIS
ALUMINIUM

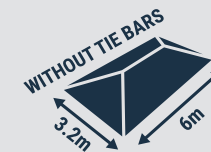

Elitis Roof Lanterns

View on [elitis.co.uk](https://www.elitis.co.uk)

Bespoke and purpose engineered aluminium thermally efficient lanterns.

Choosing the right roof lantern for your home is crucial. They should maximise light entry while retaining heat and deterring intruders. Enjoy more natural light and stunning nighttime views of the stars, enhancing your home's sense of space and tranquillity. Pairing the roof lantern with aluminium windows and doors creates a stunning, light-flooded area.

Secured by Design Upgrade Option

Our award-winning aluminium S1 roof lantern, one of the UK's most secure, now offers a Secured by Design (SBD) upgrade. This security enhancement features additional clamping plates and stainless steel security screws, locking the laminated glass panels in place to deter opportunistic criminals* even if the rafter top caps are removed.

Colour options

Aluminium roof lanterns and windows are available in three standard powder coated colours, with the option of choosing a different colour for the interior to help you create the look that is perfect for your property. Bespoke colours can also be ordered to accent, or match your particular project requirements.

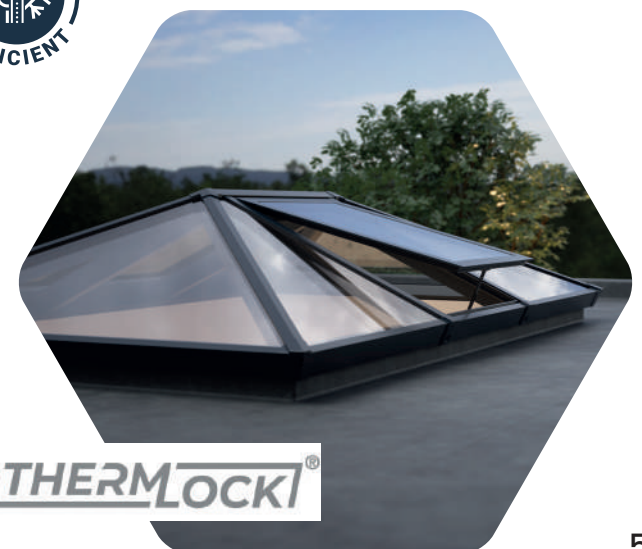

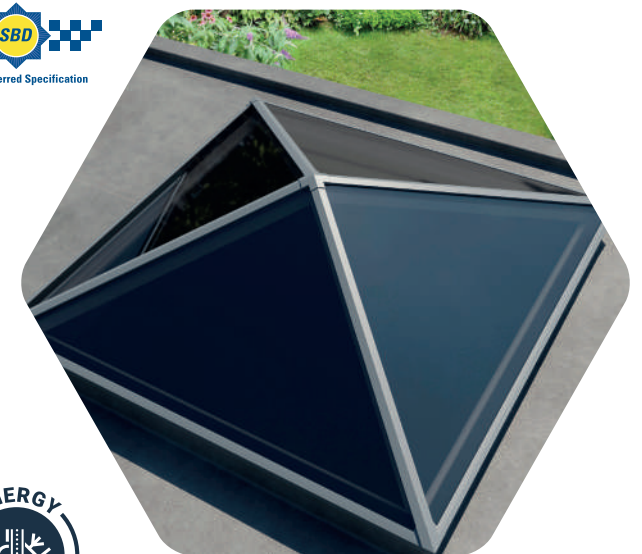

Aluminium Roof Lanterns

Constructed from robust aluminium, our modern roof lanterns with matching windows and doors require minimal maintenance. Consider the self-cleaning glass option for a virtually maintenance-free home extension that maximises light. This modern combination ensures your home stays warm and secure. The award-winning design offers spectacular views of the day and night sky, adding a sense of space and peace.

Optional Vent

The Elitis Lantern introduces a revolutionary, minimalist vent design that aligns perfectly with the lantern's rafters. Powered actuators allow for smart, automated control, eliminating the need for muntin bars and reducing leak risks. Fully thermally broken and utilising high-performance glazing, this vent feature further distinguishes the S1 lantern.

The aluminium finish, both inside and out, is enhanced by durable powder coating for a stylish appearance. Every lantern is designed with security at its core, safeguarding your home. Experience our exceptional Thermlock technology for comfort and reduced heating bills, ensuring you and your home remain cosy. Advanced thermal technology protects against the UK's challenging weather.
